BENSON STEEL FABRICATORS – COMPANY OVERVIEW

Benson Steel Fabricators is an established Structural and Miscellaneous Fabricator company, located in Saugerties, New York, centrally between New York City metropolitan area and Albany, New York. We have been providing quality steel work for both Manufacturers and Contractors, serving construction job-sites in New York, New Jersey, Massachusetts, and Connecticut, with items such as, Structural Steel, Railings, Stairs, Plate work, Shearing, Bending, and Rolling.

Benson Steel takes interest in providing our customers with estimates and bid proposals for your requirements. Our competitive price quotation and exceptional delivery guarantees each project to be completed with ease and speed.

Over the years, Benson Steel has gone through a number of changes, which have benefited the company tremendously. We are no longer a company based on a single market or a single source of revenue. We no longer do “Just Construction Projects”. We have branched out into many fields of work such as, Telecommunication Towers, Theatrical Work, Highway and Bridge Work, Commercial Construction, and Plate Work and Fabrication for other Fabricators. Our goals are based solely on pleasing our customers.

In closing, we would like to say that our reputation for doing difficult projects on time and accurately has narrowed our competition to a very small list. Our other advantage is having a very experienced work force with talent second to none. We look forward to servicing you or your company in the near future.
